

Gerhard CHROUST

Gerhard Chroust is Professor Emeritus at the Johannes Kepler University of Linz. He is also currently the secretary general for the International Federation for Systems Research. Chroust sits on the board for the Austrian Computer Society and the Bertalanffy Center for Study of Systems Sciences, and is a committee member of the Austrian Standards Institute.

Chroust has conducted research in the field of software engineering, specifically concerning the representation and enactment of software process models and quality and improvement of development processes. He also has research interests in the fields of systems science, the systemic aspects of engineering, emergence, the history of computers and information technology, and the human aspects of software development.

Chroust has authored 10 books, approximately 45 edited proceedings, and over 450 other publications.
